SUMMARY

Bachelor of Business Analytics from National Economics University (GPA 3.87/4.0). Currently a Game Data Analyst supporting multiple live mobile titles — full descriptive → diagnostic → prescriptive analytics pipeline, ETL maintenance, custom-SQL Tableau dashboards, and ad-hoc deep-dives for Project Owners and Game Designers. Previously delivered an end-to-end HR Power BI dashboard at KPIM (Microsoft Partner) and led the data analysis phase of a recommendation system at VNPT IT.

PROFESSIONAL EXPERIENCE

Game Data Analyst — Mobile Gaming Studio (Wolffun Game)

09/2025 — Present

Multiple live mobile titles · F2P puzzle & idle genres · Hồ Chí Minh City

- **Engagement-drop diagnostic on a match-3 puzzle** — Funnel investigation with sibling-game baselines pinpointed level-design culprits behind a retention cliff. *Contributed to a ~2–4% drop in level-drop rate and improved day-over-day engagement.*
- **Ad-quality monitoring system** — Automated pipeline scoring advertisers against behavioral baselines to flag toxic creatives. *Contributed to ~2% lower ad-attributable churn; saved ~4h of manual review per cycle.*
- **Force-ad cap optimization** — Behavioral-percentile + LTV-curve methodologies recommended a lower daily cap. *Contributed to ~20% higher engagement minutes with LTV holding steady.*
- End-to-end data flow (Firebase, Adjust, mediation, Play Store): ETL pipelines, custom-SQL Tableau dashboards, event tracking for new launches.
- Weekly KPI monitoring with diagnostic deep-dives; authored internal **Game Metrics Framework** for analyst onboarding.

Business Intelligence Intern — KPIM (Microsoft Partner)

03/2025 — 06/2025

HR Analytics & enterprise reporting · Hà Nội

- Designed, developed, and deployed a comprehensive Power BI dashboard for Human Resource Management, visualizing key metrics such as employee turnover, headcount, and employee tenure to facilitate strategic decision-making.
- Executed data pipeline tasks for a major reporting project for PetroVietnam Insurance (PVI), performing data processing, cleaning, and structuring from large Excel datasets to ensure data accuracy for BI reporting.
- Authored and published 3 technical blog posts on Power BI best practices, contributing to the company's knowledge base and online presence.
- Served as a Teaching Assistant for a basic Power BI course, clarifying complex concepts and resolving technical queries for over 30+ learners.

Data Analyst Intern — VNPT IT (VNPT AI)

11/2024 — 02/2025

Recommendation system for the National Public Service Portal · Hà Nội

- Spearheaded the data analysis phase of an innovation project to develop a recommendation system for the National Public Service Portal.
- Conducted user surveys and performed exploratory data analysis (EDA) on public service data to validate problem statements and assess project feasibility.
- Developed, trained, and evaluated machine learning models (KNN, LightFM, KMeans) using Python to personalize recommendations for administrative procedures.

- **Key Achievement:** Successfully engineered a recommendation engine that significantly improved user experience, achieving **90% accuracy** for users with extensive history and **40% accuracy** for new users.

EDUCATION

National Economics University (NEU)

2021 — 2025

Bachelor of Business Analytics

- GPA: 3.87 / 4.0 (Honors).
- 4× Merit-based scholarships for outstanding academic performance.
- Coursework: Statistics, Econometrics, Data Mining, Predictive Analytics, Database Systems.

CERTIFICATIONS & LANGUAGES

- **Effective Data Reporting and Visualization Certification** — NEU × VNPT AI · Nov 2024 · [verify](#)
- **International Computer Drivers License (ICDL)** · 5 modules · Score 1720 · Aug 2023.
- **Languages:** Vietnamese (native) · English (IELTS 6.5).

SKILLS & TOOLS

- **Tools:** Tableau, Power BI (DAX, Power Query), Python (pandas, scikit-learn), SQL, Firebase, Google Colab, Excel.
- **Analytical:** EDA, Diagnostic Analytics, Cohort Analysis, Funnel Analysis, A/B Testing, ETL Pipelines, Event Tracking, Statistics, ML (KNN, K-Means, LightFM).
- **Domains:** Mobile Gaming (F2P), HR Analytics, Retail Behavioral Analytics, Public Service.
- **Soft skills:** AI-augmented productivity, cross-functional collaboration, stakeholder communication, technical writing, storytelling with data.

SELECTED PROJECTS

- **Why Engagement Drops at Specific Levels** — Diagnostic funnel investigation on a match-3 puzzle game; pinpointed the level-design culprits behind a retention cliff using SQL, level-by-level baselines, and sibling-game comparison.
- **Ad Quality Monitoring System** — Designed an automated pipeline to detect and block toxic advertisers using behavioral baselines and z-score anomaly detection across mediation logs.
- **Choosing the Optimal Daily Force-Ad Cap** — Researched and ran two methodologies (behavioral percentile + LTV-curve marginal analysis) that converged on the same cap; recommendation shipped with monitoring plan.
- **HR Power BI Dashboard (KPIM)** — End-to-end Power BI dashboard with star-schema modeling, time-intelligence DAX measures, and HTML-content visuals for org charts and Gantt views.
- **Suicide Rates of Countries** — 35-year cross-country EDA + K-Means clustering combining WHO, World Bank, and Hofstede cultural-dimension data.
