SUMMARY

Bachelor of Business Analytics from National Economics University (GPA 3.87/4.0). Currently a Game Data Analyst supporting multiple live mobile titles — full descriptive → diagnostic → prescriptive analytics pipeline, ETL maintenance, custom-SQL Tableau dashboards, and ad-hoc deep-dives for Project Owners and Game Designers. Previously delivered an end-to-end HR Power BI dashboard at KPIM (Microsoft Partner) and led the data analysis phase of a recommendation system at VNPT IT.

PROFESSIONAL EXPERIENCE

Game Data Analyst — Mobile Gaming Studio (Wolffun Game)

09/2025 — Present

Multiple live mobile titles · F2P puzzle & idle genres · Hồ Chí Minh City

- Own end-to-end data flow from Firebase, Adjust, ad-mediation platforms, and Play Store: ETL maintenance, ETL job design, and custom SQL queries powering Tableau dashboards.
- Drive descriptive → diagnostic → prescriptive analyses with ad-hoc deep-dives for Project Owners and Game Designers (engagement drops, user-cohort profiling, force-ad cap optimization, ad-quality monitoring, IAP price localization, and more).
- Set up event tracking and ETL flows for new game launches, scaffolded from existing-game templates.
- Run weekly KPI monitoring across all live titles; surface anomalies and lead diagnostic investigation when metrics move unexpectedly.
- Authored an internal Game Metrics Framework brief used by new analysts and game designers during onboarding.

Business Intelligence Intern — KPIM (Microsoft Partner)

03/2025 — 06/2025

HR Analytics & enterprise reporting · Hà Nội

- Built an end-to-end HRM Power BI dashboard covering headcount, turnover, tenure, internal mobility, and predictive attrition signals — saving HR team approximately 10 hours of manual reporting per month.
- Executed data pipeline tasks for a major reporting project for PetroVietnam Insurance (PVI).
- Authored 3 technical blog posts on Power BI best practices for the company knowledge base.
- Served as Teaching Assistant for an internal Power BI training course (30+ learners).

Data Analyst Intern — VNPT IT (VNPT AI)

11/2024 — 02/2025

Recommendation system for the National Public Service Portal · Hà Nội

- Led the data analysis phase of an innovation project building a recommendation engine for public services.
- Conducted user surveys and exploratory data analysis to validate problem statements and project feasibility.
- Trained and evaluated KNN, LightFM, and K-Means models in Python; achieved ~90% accuracy for returning users and ~40% for new users (cold-start scenario).

EDUCATION

National Economics University (NEU)

2021 — 2025

Bachelor of Business Analytics

- GPA: 3.87 / 4.0 (Honors).
- 4× Merit-based scholarships for outstanding academic performance.

- Coursework: Statistics, Econometrics, Data Mining, Predictive Analytics, Database Systems.

CERTIFICATIONS & LANGUAGES

- **Effective Data Reporting and Visualization Certification** — NEU × VNPT AI · Nov 2024 · [verify](#)
- **International Computer Drivers License (ICDL)** · 5 modules · Score 1720 · Aug 2023.
- **Languages:** Vietnamese (native) · English (IELTS 6.5).

SKILLS & TOOLS

- **Tools:** Tableau, Power BI (DAX, Power Query), Python (pandas, scikit-learn), SQL, Firebase, Google Colab, Excel.
- **Analytical:** EDA, Diagnostic Analytics, Cohort Analysis, Funnel Analysis, A/B Testing, ETL Pipelines, Event Tracking, Statistics, ML (KNN, K-Means, LightFM).
- **Domains:** Mobile Gaming (F2P), HR Analytics, Retail Behavioral Analytics, Public Service.
- **Soft skills:** AI-augmented productivity, cross-functional collaboration, stakeholder communication, technical writing, storytelling with data.

SELECTED PROJECTS

- **Why Engagement Drops at Specific Levels** — Diagnostic funnel investigation on a match-3 puzzle game; pinpointed the level-design culprits behind a retention cliff using SQL, level-by-level baselines, and sibling-game comparison.
- **Ad Quality Monitoring System** — Designed an automated pipeline to detect and block toxic advertisers using behavioral baselines and z-score anomaly detection across mediation logs.
- **Choosing the Optimal Daily Force-Ad Cap** — Researched and ran two methodologies (behavioral percentile + LTV-curve marginal analysis) that converged on the same cap; recommendation shipped with monitoring plan.
- **HR Power BI Dashboard (KPIM)** — End-to-end Power BI dashboard with star-schema modeling, time-intelligence DAX measures, and HTML-content visuals for org charts and Gantt views.
- **Suicide Rates of Countries** — 35-year cross-country EDA + K-Means clustering combining WHO, World Bank, and Hofstede cultural-dimension data.
